

Crystal clear packaging made of eco plastic foil

Shine with environmental protection

A polybag that is no longer a polybag? This works!
Excellent characteristics and in its appearance and feel
indistinguishable from »normal« foil.

The polybag for the »packaging with side effects« is made
out of 100% renewable materials. Completely produced
without oil shares, the carbon emissions in the production
is around 70% lower as in the production of »traditional«
foil and it can be completely recycled.
