

Black colored pencils

... because it is not always the color that attracts attention.

Puristic & precious elegance with black colored pencils

Black colored pencils appear quite puristic and precious, and that is also transferred to your advertising message on the pencil.

Due to that, we lacquer the black colored pencils in one of 26 standard colors. Combine the black pencil with a metal silver ferrule or choose one ferrule color together with one of 15 eraser colors.

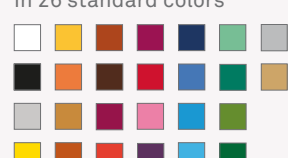

Certified quality
